First Lesson Preview

The first lesson begins with a simple truth: dreams are often fragile when they are first spoken. A careless word can bury them, but an encouraging word can give them room to breathe.

A Dream Builder does not have to have every answer. A Dream Builder begins by listening, believing, encouraging, and helping someone take one small step forward.

Try This This Week

- Ask one person, "What is something you still hope to do?"
- Listen without correcting or minimizing their dream.
- Offer one sincere word of encouragement.
- Help them identify one small next step.
